## PROFILE

Experienced Lead Full Stack Developer with strong expertise in Java, Spring Boot, Vue.js, and TypeScript. Skilled in designing and delivering scalable backend and frontend solutions, managing system performance, and ensuring high code quality. Proven track record of leading development processes, mentoring team members, and driving feature discussions with product managers. Previous experience includes several years as a Java/SAP Hybris developer, providing a solid foundation in enterprise e-commerce and microservices architecture. Fast learner with strong problem-solving skills, perseverance, and responsibility.

## EMPLOYMENT HISTORY

Nov 2023 — Present

Lead Full Stack Developer, Aspira, OddsMarket

Remote

- **Description:** The service provides data on sports events in the form of XML or JSON feeds. This data can be used for developing your own applications, maintaining statistics, analyzing the results of sports events and trading.
- **Technologies:** Java 17, Spring Boot 3, Vue.js, TypeScript
- **Database:** MySQL, ClickHouse, Redis
- **Tools:** GCP, Grafana, Rollbar, Docker, Postman, Jira, Confluence, AI (ChatGPT, JetBrains Junie, JetBrains AI Assistant), Slack, GitHub
- **Responsibilities:**
  - Leading development process and coordinating with the project manager to discuss and refine new features and changes
  - Creating and managing tickets, ensuring clear requirements and prioritization
  - Designing and implementing business logic on both backend (Java, Spring Boot) and frontend (Vue.js, TypeScript)
  - Conducting interviews and supporting the recruitment process to grow the team
  - Holding 1:1 meetings and mentoring team members to improve performance and collaboration
  - Monitoring system performance, investigating incidents, and ensuring high code quality through reviews and best practices

Oct 2021 — Nov 2023

Software Developer, EPAM, Home Store & Garden Center

Remote

- **Description:** Hybris + microservices-based project for Ecom retail company. This extensive project involves numerous microservices, each dedicated to specific functions such as generating daily reports, checkout process organization (such as generating delivery calendar), synchronizing warehouse operations with the site, and more. Significant efforts are also directed towards customizing CSCockpit, and implementing separate custom administration pages for specific purposes.
- **Technologies:** Java 8, SAP Hybris 6.5, Spring, Cucumber, NodeJS, Serverless framework, Scrum
- **Database:** MySQL
- **Tools:** AWS, Docker, Postman, Jira, Confluence, Jenkins, GitLab, IntelliJ, WebStorm
- **Responsibilities:**
  - Hybris, Spring, JSP, JS, Html/CSS tasks
  - CSCockpit customization
  - AWS Lambda implementation in Node JS. Serverless framework setup
  - eBay integration via Channel Advisor
  - Unit and BDD (Cucumber) tests
  - Fixing bugs related to Hybris, Spring, Java, JS, NodeJS

Apr 2021 — Sep 2021

Software Developer, EPAM, Retail supermarkets and grocery delivery service

Remote

- **Description:** Hybris backend + Spartacus frontend project for Ecom retail company. The main goal were to transition the website from a Multi-Page Application to a Single-Page Application structure, while also incorporating CRM integration with loyalty card support and enabling CMS functionality.
- **Technologies:** Java 11, Hybris, Spring, BDD, Rest API, Scrum
- **Database:** MySQL
- **Tools:** Postman, Jira, Confluence, Bitbucket, Jenkins, SAP Cloud, IntelliJ

- **Responsibilities:**
  - CRM integration. Registration logic regarding loyalty cards in the CRM system
  - Hybris, Spring, SmartEdit components tasks
  - Unit tests
  - Fixing bugs related to Hybris, Java, CMS components.

Jun 2020 — Apr 2021

Trainee, EPAM Lab

Remote

- Obtained essential skills in Java and Hybris development.
- Developed practical expertise in JSP (JavaServer Pages) for dynamic web application development.
- Gained hands-on experience with SQL for database management
- Gained practical experience with JS, jQuery, HTML/CSS for web development.
- Acquired proficiency in unit and integration testing methodologies.
- Developed familiarity with Git version control.

---

## PET PROJECTS

Jul 2025 — Aug 2025

Full Stack Developer, Portfolio

- **Description:** Personal portfolio website to showcase CV, pet projects, and technologies. Built to practice React and Tailwind CSS while learning deployment workflows.
- **Technologies:** React 19, TypeScript 5, Tailwind CSS v4, Vite
- **Tools:** Vercel, GitHub, Prettier, ESLint, AI (ChatGPT, JetBrains Junie)
- **Responsibilities:**
  - Developing responsive UI with modular React components and Tailwind styling
  - Implementing routing for pages (Home, About, Resume, Projects)
  - Deploying and maintaining the project on Vercel with GitHub integration

Aug 2022 — Jan 2023

Full Stack Developer, Messenger

- **Description:** Messenger is a pet project aimed at building a user-friendly messenger application, inspired by the popular Telegram platform. The project's main goals are to gain experience with React.js, TypeScript, WebSocket, GitHub CI/CD, Spring Boot, Spring Security, Serverless Framework, Docker, and OAuth 2. Key features: real-time messaging with WebSocket, simple registration and login, chat and user search, lazy loading for smooth experience.
- **Technologies:** Java 11, Spring Boot, React.js, React Redux, TypeScript, AWS, Serverless framework, WebSocket, OAuth 2, Rest API
- **Database:** MySql
- **Tools:** Docker, Postman, GitHub, IntelliJ IDEA, Visual Studio Code
- **Responsibilities:**
  - Adding controllers, services, repositories, converters, etc. on the backend side
  - Adding components, configuring TypeScript, Redux on the frontend side
  - Implementing WebSocket logic on both backend and frontend sides
  - GitHub CI/CD setup
  - Configuring Serverless framework to be able to deploy both backend and frontend projects to AWS
  - Configuring authentication and authorization

---

## TECHNICAL SKILLS

### Programming languages

Java (6 years), JavaScript (5 years), TypeScript (3.5 years)

### Technologies and Frameworks

Spring, SQL, Hybris, GCP, AWS, Linux, NodeJS, Vue.js, React.js, Tailwind CSS, Bootstrap, jQuery, HTML, CSS

### Tools

Git, Docker, Postman, Vercel, Jenkins, Gradle, Maven, Jira, GitLab, GitHub, Bitbucket, IntelliJ Idea, WebStorm, Visual Studio Code, Slack, Teams

### Databases

MySQL, PostgreSQL, Redis, ClickHouse, AWS DynamoDB

Testing

Java: JUnit, Mockito, Cucumber

JavaScript: Jest
